Payment Integrity Portal

Easy access to insight

HMS's® Payment Integrity Portal helps move data from facts and figures into meaningful information that can be used to initiate action. It offers access to HMS's analytical tools that are all designed to offer clarity into specific data perspectives for immediate insight.

The tiles in the Payment Integrity Portal offer immediate access to the results of HMS's analytics. There is no need to traverse dashboards or multiple menus. Instead the information is provided concisely utilizing graphics and charts that offers immediate clarity for analysts and for the boardroom.

Payment Integrity Portal offers:

- **Advanced Search:** Search for a specific provider, member or location to view general statistics and explore with graphical views.
- **Guided Analytics:** Numerous models and reports are readily available and refreshed with every data load. The Guided Analytics easy-to-use interface and powerful visualizations simplify target identification across provider, patient, pharmacy, and global metrics, and truly guides the user to the answers.
- **Case Tracking:** Manage investigative cases and all documentation, related activities, and findings.
- **Link Visualization:** Immediate transparency into relationships between providers and members
- **Provider and Patient Profiles:** On-demand statistical data and metrics helps investigators build immediate context when exploring inappropriate billing behaviors.
- **Lead Management:** Built to help SIUs triage and move leads into effective investigations through efficient workflow and documentation tools.
- **Custom Analysis and Reports:** Data queries and ad hoc reports. Create custom reports and leverage report templates.
