

Investigation Support

Scrutinize high-risk targets and prevent overpayments.

Fraud is an arms race. As detection techniques evolve, criminals and their schemes become increasingly sophisticated. In order to stay ahead of the game, it's imperative that you use the most agile, evolved, and mature detection system available for your investigation support. You need HMS.

Medical fraud is an enormous drain on our health system, affecting all who pay for care. Medicare Fraud Strike Force teams – comprised of the Office of Inspector General, the Department of Justice, Offices of the United States Attorneys, the Federal Bureau of Investigation, local law enforcement, and others – launched in 2007 to address the issue.

Since their inception, these teams have:

- Brought 1,387 criminal actions
- Indicted 1,977 individuals
- Uncovered \$1.8 billion in fraudulent activity

But there's so much more to be done.

HMS's Investigation Support streamlines everything from the identification of high-risk investigation targets to the pursuit of recoveries. We offer full analytical, clinical, coding, and investigative assistance to help you tackle all issues related to improper payments.

The best investigations require both best-in-class technology and expert staff. HMS

utilizes the optimal mix of automated analysis combined with the knowledge and experience of our multi-disciplinary team of former law enforcement professionals, seasoned healthcare investigators, clinical investigators, and coding specialists.

Our comprehensive case tracking system includes customized business rules to ensure all investigative components are completed in required time frames and coordinated resources, avoiding duplicate work and increasing overall effectiveness. Our secure interface – Payment Integrity Portal – brings the components of HMS Improper Payment Prevention to your fingertips, wherever you may be.
